

**SUMMARY**

The Stellar Wide is an IP20 batten ideal for commercial and industrial applications. It features Tri-Colour selectable and Multi-Watt selectable technologies, giving installers the choice of 3 colour temperatures and 4 wattages in 1 fitting so that fewer varieties are required to meet a broader range of needs. For quick and easy installation, the Stellar has been engineered with a clever toolless end cap and quick-to-fit single piece LED light module. It also incorporates multiple cable entry points and a large 6mm terminal block. The integrated sensor's dimming function can be conveniently controlled from a distance with the compatible remote control - available to order separately
