

Case Study

NECA Office Lighting Upgrade with Energetic Lighting and NSG Boffa

Energetic Lighting had the pleasure of working with NECA SA/NT and NSG Boffa to upgrade the entire NECA SA/NT office space from old fluorescent lighting to new LED lights.

Working with Energetic Lighting SA/NT Sales Manager Stuart Mark and NSG Boffa Commercial Manager Cos Boffa, Energetic Lighting provided NECA SA/NT with 82 new lights for their office, which was then installed by NSG Boffa technician Jake Ramage and NECA Careers & Apprenticeships (NCA) apprentice Jack Henderson in September. "Energetic Lighting made the entire process extremely simple for us, and ensured we had everything we needed to get the job done." quote Larry Moore – Executive Director of NECA SA/NT

The lights installed include 60 Destiny Plus panels, 6 new Low UGR Trivalite Pro lights in the reception area and 16 Tempest V Weatherproof IP65 Battens in the carpark and stairwell. "The difference it has made to the office lighting levels is phenomenal and we are sure we will see savings in our next electricity bill." quote Larry Moore – Executive Director of NECA SA/NT

"NECA SA/NT would like to sincerely thank Energetic Lighting, NSG Boffa and NECA Careers & Apprenticeships (NCA) for their fantastic work on this project." Larry Moore – Executive Director of NECA SA/NT
